Restoring the Building Blocks of Education Since 1989.

You're building the future, we're
preserving the past.

Jamison Masonry Restoration sees as much potential in your school as you do in its students, a foundation and history that needs care, attention, and occasionally even a little shoring up.

With over two decades experience repairing, restoring, and preserving educational and institutional masonry at both the residential and commercial levels, **Jamison** provides not only a superior level of workmanship, but a team of masons pre-screened and background-checked for the safety of your students.

You wouldn't trust your pupils' educational future to just anyone, why treat their facilities any differently?
